

# WonderlandWizards: Passive-Income NFTs Built on the Ethereum Blockchain

March 21, 2022

v. 1.2

## Abstract

WonderlandWizards is a collection of 5000 income-yielding NFTs built on the Ethereum blockchain. Minted funds will be put into a treasury that earns interest based on a variety of investments. Each NFT operates as a lottery ticket, where holders have a chance to win a share of the accumulated interest from that week. In theory, as the treasury compounds, the rewards available to holders will increase, as will the value of the NFT since it is the only method for gaining access to the drawings, thus creating a sustainable lottery system with the advantages of blockchain security and anonymity.

## 1. MINTING

The WonderlandWizards project is officially scheduled to launch on Saturday, April 30th at 18:00 UTC, with private sales beginning Friday, April 29th at 18:00 UTC. The project team has decided to split the release of all 5000 WonderlandWizards into a series of launches. Phase 1 begins April 30th with the release of 500 WonderlandWizards. Phase 2 will occur within a few weeks of Phase 1 selling out and will include 500 WonderlandWizards at 0.03 ETH each. Phase 3 will follow the same process as Phase 2 but include 500 WonderlandWizards at 0.04 ETH. Finally, Phase 4 will follow the same process as the previous releases, but include the remaining 3500 WonderlandWizards

at .05 ETH. The reasoning behind this staged approach stems from our desire to begin the weekly giveaways as soon as possible, as well as delay the release for larger portions of the supply until we are confident the project will sell out. Beginning the weekly giveaways sooner rather than later will allow for the opportunity to demonstrate the utility of the project in an attempt to grow the community and generate more demand for the product. The costs for mint at the first launch will be 0.02 ETH for both private and public sales, these calculations do not include necessary gas fees. Each address given access to the whitelist will be eligible to mint five WonderlandWizards during the private
